

Dear Hiring Manager,

As a passionate and adaptable technology professional with a Diploma in ICT Application Development, I am excited about the opportunity to bring my experience and enthusiasm for creating impactful digital solutions to your team.

Over the past few years, I have built a solid foundation in software and business application development. My experience spans developing responsive web and mobile applications using technologies such as React, Vue.js, React Native, and C#, as well as creating backend systems with Node.js, Express.js, and MongoDB. I've also had the opportunity to streamline development processes through low-code platforms.

In my current role as a Junior Power Platform Developer, I design and implement business solutions using Power Apps (both Canvas and Model-driven), Power Automate, and Power Pages. I regularly work with Dataverse and SharePoint, and I've integrated Microsoft Dynamics 365 into business processes, extending functionality with HTML, CSS, JavaScript, and JSON.

Beyond development, I have hands-on experience with Power BI, WordPress, Excel, and Microsoft Office tools, all of which have supported my ability to analyze data, enhance user experiences, and contribute to business intelligence efforts.

One of my proudest achievements was earning first place at the CapaCiTi Data Analytics Hackathon. I developed a candidate dashboard using Power BI, Java, and Spring Boot to track and visualize learning progress. This experience highlighted my ability to apply technical knowledge in creative and practical ways that drive real value.

I bring not only technical expertise but also strong communication skills, attention to detail, and a collaborative, solution-oriented approach to problem-solving. I thrive in team environments and enjoy working within Agile frameworks to deliver results.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and background align with your team's goals and how I can contribute to your success.

Sincerely,

Asekona Xanywa
